

PEACE OF MIND DURING OUTAGES & SHUTOFFS

PROPANE CAN DO THAT®

IF YOU'VE BEEN AFFECTED BY ELECTRICAL BLACKOUTS due to fire danger conditions, you know how stressful it is to be without power unexpectedly. Because public power shutoffs are becoming a necessary safety measure during wildfire season — and officials recommend preparing for outages longer than 48 hours — it's important to have a standby power plan for your home.

PROPANE STANDBY GENERATORS

If you're worried about being in the dark for extended periods of time, you can find unmatched comfort and peace of mind by having a propane standby generator installed for your home. If you already have propane appliances, a standby generator is a terrific addition that will provide a better level of comfort during an outage — by keeping phones and other devices charged, your air conditioner running, the refrigerator powered, and more.

TOP 3 REASONS HOMEOWNERS LIKE PROPANE STANDBY GENERATORS

1. Reliability.

Propane standby generators deliver supplemental electricity in as few as 10 seconds after an outage. Unlike gasoline and diesel, propane doesn't degrade over time, making it an ideal fuel for standby power. It's always there as soon as you need it.

2. Versatile Options.

Propane systems are available in a variety of capacities to fit the needs of any size home and can power several major appliances:

- Furnaces/boilers
- Water heaters
- Cooking appliances
- Refrigerators
- Fireplaces
- Medical devices

3. Clean, Quiet Operation.

Not only is propane a non-toxic, non-poisonous fuel that won't contaminate soil or water, but propane systems also produce significantly fewer greenhouse gas emissions compared with diesel or gasoline. Propane generators also operate quietly, at about the same volume as a normal conversation.

PROPANE STANDBY GENERATORS DO NOT NEED TO BE FILLED BY THE HOMEOWNER LIKE GASOLINE AND DIESEL MODELS.

A PROPANE GENERATOR CAN HANDLE AN ENTIRE HOME'S ENERGY NEEDS FOR DAYS, UNLIKE SOLAR- AND WIND-POWERED SYSTEMS.

A POWER OUTAGE COSTS A FAMILY AN AVERAGE OF \$1,250*. A PROPANE GENERATOR KEEPS YOUR HOME RUNNING TO HELP YOU AVOID THOSE UNEXPECTED EXPENSES.

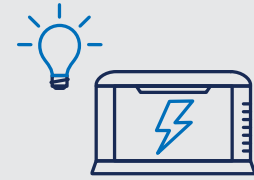

* Power Outage Impact Research, B2B International – 2015.

FOR ALL THE ESSENTIALS, COUNT ON PROPANE

FOR EXISTING PROPANE HOMES, A STANDBY GENERATOR ENSURES YOU'LL HAVE ACCESS TO ALL YOUR FAVORITE PROPANE APPLIANCES DURING AN OUTAGE. FOR ALL-ELECTRIC HOMES, CONSIDER ADDING THESE POPULAR PROPANE APPLIANCES FIRST, ALONG WITH A STANDBY GENERATOR FOR MAXIMUM COMFORT AND PEACE OF MIND.

WATER HEATING

Condensing tankless water heaters can provide energy savings up to 40 percent over conventional, electric water heating systems while providing endless hot water delivery.

TANKLESS
WATER HEATER

STORAGE TANK
WATER HEATER

HOME HEATING

Propane forced-air furnaces provide airflow up to 25 degrees warmer than the average electric heat pump and typically last twice as long.

COOKING

Eating out every night during an outage can add up financially. Propane cooking appliances won't strain your generator's capacity.

FIREPLACES

Not only do they provide six times the heating capacity of wood-burning models, there's no soot or ash to clean up, and no firewood to store.

NEXT STEPS & AVAILABLE REBATES

Contact your local propane supplier to talk about which propane generator makes sense for your home, and to learn more about pricing and installation options. To see if a safe installation rebate is available in your area, go to PropaneBackUpPower.com. Remember, always maintain one week's worth of fuel in your propane tank if your home is in an area of high fire danger.
